

Lordco carries a complete line of quality cleaners & accessories

About our hose:

Pro-Wash uses only high quality, wire braided hose on all our pressure washers. Our **Tuff Skin** hose has proven to be seven times more abrasion resistant than standard pressure washer hoses. Our hose also has a Class A Oil Resistance Rating whereas most other are class B. Meets UL-1776 Safety Standard with 2 hose guards for added operator protection against burst. **Hydraulic Hose is not designed for pressure washer applications.** The inner tube will crack over time when in contact with water. It is not designed for hot water and the crimp fitting does not allow for expansion and contraction for hot water applications. Remember, hydraulic hose is not in the operators hands - must have a swedge guard or bend restrictor 24" long at operator end for compliance with national safety standards.

Just another way Pro-Wash Pressure Washers out performs the competition!

Choosing a Pressure Washer

For commercial use, typically use the GX Honda engine, with the longer lasting triplex Italian pump and 50' of hose found in the Industrial Cold Water category.

For the home or light industrial user, where only pressure washing occasionally (1 or times per month), the Kohler or Honda GC engine with the lighter duty Axial pump and 25' Hose will suffice and provide years of service. These users have the option of going with 2300 or 2700 psi. See all the options under Consumer/Light Duty models.

Determining between electric or gas powered will depend on whether they are using it inside or outside, electrical requirements available, and type of pressure washing. Generally, industrial electric units cost more than gas powered units.

Hot water is for customers cleaning heavy equipment, companies with fleets and those working in mining, construction, and oil patch industries. Contact your local Lordco salesperson for further information or if you have any questions!

Fact: Gallons per minute (GPM) is more important than the pressure (PSI). The water does the work!

Remember: Running a pressure washer for more than a few minutes without the trigger pulled (on) may cause damage due to overheating the water circulating in the pump and will not be covered under warranty. **Turn the pressure washer off when going to be away for more than 5 minutes!**

Industrial Duty Gas Powered Pressure Washers Series

- Honda GX series low oil shutdown engines
- General Italian direct drive pumps
- Industrial Duty wheel kits
- Pneumatic Tires (Flat Free Optional)
- 50' high pressure hose with quick disconnects
- Insulated shut off gun and 36" wand
- 3 high pressure nozzles, 1 soap nozzle
- Downstream chemical injector
- Variable pressure control
- Thermal pump protector
- Operating instructions and warning labels

PW2500G

Pressure - PSI 2500
Volume - GPM 3
Engine - H.P. 6.5 (200 cc)

PW3000G

Pressure - PSI 3000
Volume - GPM 4
Engine - HP 13 (390 cc)

PW3500G

Pressure - PSI 3500
Volume - GPM 4
Engine - HP 13 (390 cc)

PW4000G

Pressure - PSI 4000
Volume - GPM 4
Engine - HP 13 (390 cc)

Optional Hose Reel Attachment
Part #PW02755030K

Light Industrial/Consumer Gas Powered Pressure Washers Series

- Honda GC engine/Kohler Engine
- AR RMV/SJV axial piston pump
- Industrial duty wheel kit with pneumatic tires
- 25' high pressure hose with quick disconnects
- Insulated shut off wand and 36" wand
- 3 high pressure nozzles, 1 soap nozzle
- Thermal Pump Protector
- Downstream chemical injector
- Operating instructions and warning labels

PW2705GKI

Pressure - PSI 2700
Volume - GPM 2.4
Engine - HP 6.5 Kohler
Pump - AR-RMV Axial Pump

PW2300GI

Pressure - PSI 2300
Volume - GPM 2.4
Engine - HP 5 Honda GC
Pump - AR-RMV Axial Pump

PW2705GI

Pressure - PSI 2700
Volume - GPM 2.4
Engine - HP 6.5 Honda GC
Pump - AR-RMV Axial Pump

PW2305G

Pressure - PSI 2300
Volume - GPM 2.4
Engine - HP 6.5 Honda GC
Pump - AR-SJV Axial Pump

PW2705G

Pressure - PSI 2700
Volume - GPM 2.4
Engine - HP 6.5 Honda GC
Pump - AR-SJV Axial Pump

Industrial Duty Electric Pressure Washers Series

- Industrial Duty Marathon TEFC electric motor
- General Italian direct drive pumps
- Industrial Duty wheel kits
- Pneumatic Tires (Flat Free Optional)
- 25'/50' high pressure hose w/quick disconnects
- Insulated shut off gun and 36" wand
- 3 high pressure nozzles, 1 soap nozzle
- Downstream chemical injector
- Variable pressure control
- Thermal pump protector
- Operating instructions and warning labels.

PW1400E

Pressure - PSI 1400
Volume - GPM 2.1
Motor - H.P. 2.0
Volt/Phase/Amp 115/1/ 20

PW1500E

Pressure - PSI 1500
Volume - GPM 3
Motor - H.P. 3.0
Volt/Phase/Amp 230/1/ 13

PW2000E

Pressure - PSI 2000
Volume - GPM 3.5
Motor - H.P. 5
Volt/Phase/Amp 230/1/ 22

PW3000E

Pressure - PSI 3000
Volume - GPM 4
Motor - H.P. 7.5
Volt/Phase/Amp 230/3/ 21

Consumer Electric Pressure Washers

PWAR141 1600 PSI @ 1.6 GPM
Automatic Start/Stop, 20' Pressure Hose
Adjustable Spray Nozzle
Lance Holder, Foam Spray Attachment
120V 18 amps Weight 18 lbs.
